DETAILED ACTION

1. Claim 1 is objected to because of the following informalities: “expect”, line 5, should be -- except --. Appropriate correction is required.

2. Claims 14 is rejected under 35 U.S.C. 251 as being an improper recapture of broadened claimed subject matter surrendered in the application for the patent upon which the present reissue is based. See *Pannu v. Storz Instruments Inc.*, 258 F.3d 1366, 59 USPQ2d 1597 (Fed. Cir. 2001); *Hester Industries, Inc. v. Stein, Inc.*, 142 F.3d 1472, 46 USPQ2d 1641 (Fed. Cir. 1998); *In re Clement*, 131 F.3d 1464, 45 USPQ2d 1161 (Fed. Cir. 1997); *Ball Corp. v. United States*, 729 F.2d 1429, 1436, 221 USPQ 289, 295 (Fed. Cir. 1984). A broadening aspect is present in the reissue which was not present in the application for patent. The record of the application for the patent shows that the broadening aspect (in the reissue) relates to claim subject matter that applicant previously surrendered during the prosecution of the application. Accordingly, the narrow scope of the claims in the patent was not an error within the meaning of 35 U.S.C. 251, and the broader scope of claim subject matter surrendered in the application for the patent cannot be recaptured by the filing of the present reissue application.

In particular, the omitted/broadened claim limitations which provide the broadening aspect to the claims are the following limitations: “without attachment to said enclosure, said core computer unit (which is the first component of claim 14) is dormant and non-functional as a computer” which is presented in claim 22 of the original application, and which applicant relies on to define the claimed invention over the prior art in the amendment filed on 05/12/1999; "said core computer unit having means to retain stored information event when separated from said

enclosure, said stored information usable in said core computer unit with said plurality of different enclosure”, and the core computer unit has “means to be use interchangeable with different types of enclosures”, which are presented in claim 22 of the original application, and which applicant relies on to define the claimed invention over the prior art in the amendment filed on 07/21/1999.

3. Claims 1-8 are allowed.

4. Applicant's arguments filed 08/14/2009 have been fully considered but they are not persuasive with respect to new claim 14. As set forth above, claim 14 clearly omits limitations that applicant relies upon to define the claimed invention over the prior art during the prosecution of the application of the patent. Thus, claim 18 is an improper recapture of broadened claimed subject matter surrendered in the application for the patent upon which the present reissue is based.

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

Art Unit: 2193

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
